

# 1 Year of Dynamic Achievements

After one year of our operating under the TurboCare name, we are proud of the growth of our working culture and of our business expansion without geographical limits, within the highest quality and environmental standards that is TurboCare.

In the past year, we can highlight our expansion of our capabilities through Latin America in steam turbines, gas turbines and generators in countries such as Panama, Colombia and Argentina. Also, we hosted our technical seminar held in Cartagena, Colombia during the month of May. We continue to also improve our shop in order to perform repairs and service with the most high-tech equipment.

We have also accomplished synergy with TurboCare's shops around the world to improve our world class service, while attaining superior turnaround times.
